This assignment is an individual assignment, collaboration is prohibited.

Chaterbox

In class project.

SportsStore

SportsStore features will be demonstrated in class.
- ❏ Admin: Use AJAX to inform the user when there already is a product with the same name.
- ❏ Admin: Use JavaScript to give the user a preview of the product photos.
- ❏ Use AJAX to allow users to like products.
- ❏ Use AJAX to allow users to review products.
- ❏ Use AJAX to build a contact form.
- ❏ Use AJAX to allow users to build a wishlist of products.

Portfolio

- ❏ Refactor the work you did previously with projects to use navigation properties and remove the project view model. *You do not need to add an administrative interface. Keep the same table schema.*

- ❏ Use AJAX to improve the Contact form.
    - ❏ When the user clicks Send/Submit use jQuery to handle the submit event.
    - ❏ Check that all fields have been populated.
    - ❏ Send the data to the server using the **$.post()** method.
    - ❏ If the email is sent successfully, collapse the contact form and inform the user that you will get back to them shortly.
    - ❏ If an error occurs in sending the email, display an error message beneath the body of the message and allow them to try again.

This assignment is an individual assignment, collaboration is prohibited.

<u>Blogger</u>

- ❏ Use AJAX to allow users to like posts.
    - ❏ Add a count of likes to the bottom of each post (before the comments)
    - ❏ Add a like button to the bottom of each post (before the comments)
      https://fontawesome.com/icons/thumbs-up?style=solid
    - ❏ When the user clicks the like button use the **$.post()** method to send the request to server.
    - ❏ If successful, update the number of likes and hide the like button.
    - ❏ If an error occurs, show the error message in a javascript alert.

- ❏ Use AJAX to improve the comment form.
    - ❏ When the user clicks Send/Submit use jQuery to handle the submit event.
    - ❏ Check that all fields have been populated.
    - ❏ Send the data to the server using the **$.post()** method.
    - ❏ If the email is sent successfully, collapse the comment form and inform the user that comment has been submitted.
    - ❏ If an error occurs in sending the email, display an error message beneath the comment and allow them to try again.

<u>WorkOrders</u>

- ❏ Use AJAX to make editing parts easier.
    - ❏ On the Order/View page add a button to delete a part.
        - ❏ Use a bootstrap modal dialog to confirm that the user wishes to delete the part.
        - ❏ Use AJAX to implement the functionality without refreshing the page.
    - ❏ On the Order/View page add a button to add a part.
        - ❏ Use a bootstrap modal dialog to let the user enter the Part Number, Part Name, Quantity, and Part Cost.
        - ❏ Use AJAX to implement the functionality without refreshing the page.
